Drivetrain RWD
 Transmission 1-Speed Direct-Drive Automatic
 Engine 0cyl - 0.0L
 Fuel Type Electric
 Interior Light Gray
 Exterior Twilight Blue Metallic

The Tesla Roadster was based on the aluminum tub from the contemporary Lotus Elise, with which it shared its windshield and windshield frame. The remainder of the carbon-fiber body panels were unique to the Tesla, which featured a 2" longer wheelbase than the Elise. This example is finished in Twilight Blue Metallic and is equipped with a removable body-color roof panel, a black removable soft top, an exterior charging port, and LED taillights.
