Vehicle Details

2008 Tesla Roadster delivered in 2009. Second owner with only 4,113 original miles. Tesla folks say it is as nice a roadster as they ever seen. Tesla installed the Xenon headlight package as original headlights were not very bright. (This was a \$2000 upgrade) Tesla just installed new battery pack in February 2021; shows a full 194 mile range when charged. Roadster body was built by Lotus in England - very much styled after the Elise. British racing green with tan leather interior. Car has many carbon fiber components. I have enjoyed this car thoroughly but health forces sale. Has both hard and soft tops (soft top has never been used - just put on for the pictures so it is like new.) Comes with the optional 220V fast charger which will bring car to full charge in about 4 hours, Only about 1000 of the roadsters were built and many of them are no longer on the road so don't miss this opportunity to own a piece of history. This was number 235 when delivered in 2009. Elon Musk sent one of these into space with SpaceX and it is 72 million miles from earth heading into deep space. All original manuals and toolkit. Car is currently inspected in VA.
