odometer: **52000**

paint color: **green**

title status: **clean**

transmission: **other**

Own a piece of Tesla history that is appreciating with the passing of each year.
2011 2.5 British Racing Green Tesla Roadster
This is the Last year of production with the most refinements like more aerodynamic body style and wider/more comfortable seats with Lumbar support.
Last VIN is approximately #1390 Mine is #1333
Told by Carl Medlock (Roadster expert) that only 1 green 2.5 was built and this is it.
It has many upgrades including double din stereo unit with backup camera, sound matting to make car much quieter, new oem carpeting (purchased the last new carpets available), 220v 90A high power wall charger, 2 mobile charge adapters for both NACS and J-1772, car covers, aftermarket clear polycarbonate top, like new convertible top, oem adjustable sport suspension. Yes thats about \$15k in upgrades.
Exterior in excellent shape, Interior very good shape except scratches on driver seat.
Standard range still at 172 miles (Was 188 when new). Extended range about 200 miles.
This car is pristine except for the scratches on the side of the drivers seat.
