My Range in 3 Years

252 - 253 miles

Over time, your battery will age and your expected range may change. Taking good care of your EV can have the long-term benefit of slowing these changes.

- This vehicle
- Similar cars
- Not enough data

Learn more →

How am I charging?

To minimize battery degradation, we recommend that you aim to keep your charge between 30% and 80%

COLLECTING DATA

We're still collecting charging data. The rest of this module usually displays within the first 2 weeks. Check back soon!

Learn more →

How far can I go?

This map gives a visual representation of how far this car's range will take you, centered around the vehicle's location.

Learn more →

How does range change with temperature?

You can expect range to change daily due to very high or low temperatures and this may not be reflected on the vehicle's dashboard.

- Cold (32°F)
261 miles
-1 miles
- Ideal (57°F)
262 miles
- Hot (99°F)
261 miles
-1 miles
