

**To whom it may concern;**

The Tesla Model S is fitted with an anti-theft approved to the requirements in UNECE Regulation No. 116.00 (Uniform technical prescriptions concerning the protection of motor vehicles against unauthorized use)

UNECE R116 Approval Number: **E4-116RLAI-000200**

Description of the system;

**Immobilizer**

Electronic immobilizer acts on the Model S drive unit and prevents the vehicle from starting until a valid key fob is present in the vehicle.

**Alarm**

Sensors fitted to each passenger door, the bonnet and tailgate that sounds the alarm sounder when they are opened.

**Optional Alarm system**

If the customer selects the Model S security package, the vehicle is fitted with the following systems;

- Intrusion sensor: Detects movement inside the passenger compartment or an intruder reaching in through a front window and will sound the alarm.
- Tilt sensor: Detects if the vehicle is being lifted onto a tow truck and sounds the alarm.
- Battery Backed Sounder: Additional alarm sounder with its own power supply so will continue to function even if the vehicle 12V power is cut off.
