

## How to turn on the DVR Gsensor

Q:Why do we need to turn on the DVR Gsensor?

A:When the car was cracked or happened a violent impact, it can lock the video at once when you turn it on.So it is very important for your driving.

Please follow the detail steps to turn it on.

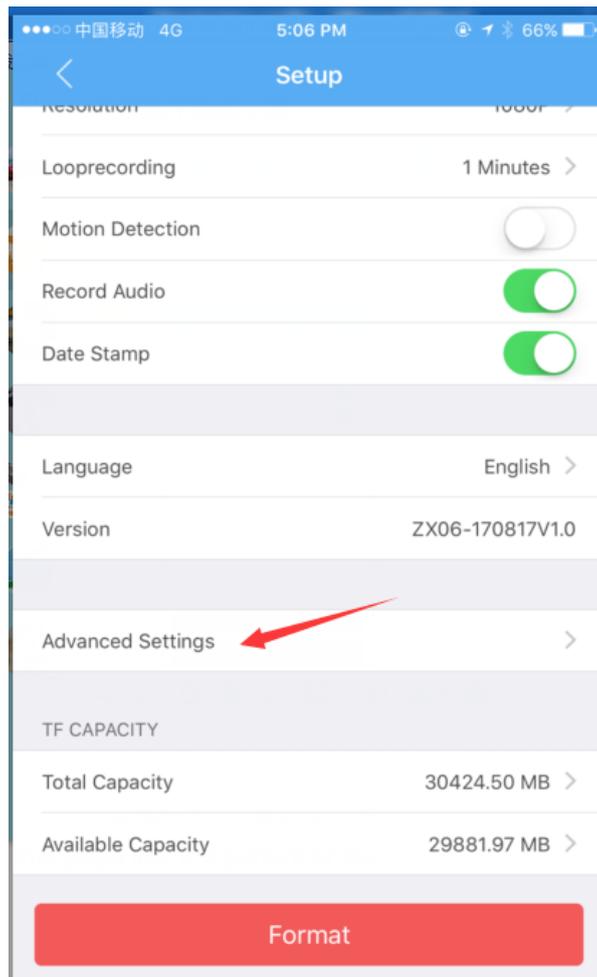

1<sup>st</sup> Connect the DVR WIFI named Tesla-Topfit. Then enter the APP which is the newest system from the App store.

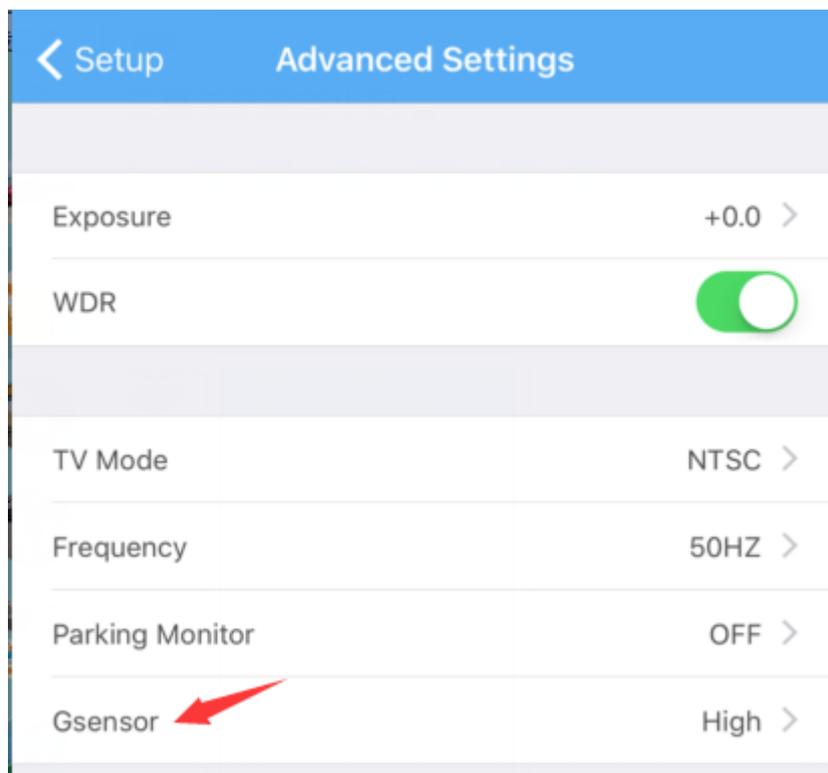

Click the Steup.

2<sup>nd</sup> Find this page like the picture show.

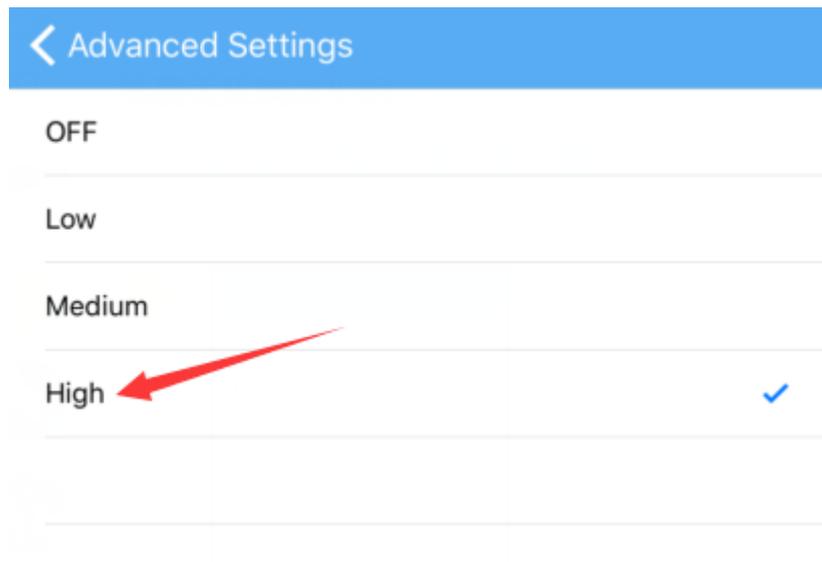

Enter the advanced Settings.

3<sup>rd</sup> Click the Gsensor.

4<sup>th</sup> Then turn it on.

That is finished.

Thank you for your reference and if you have any other questions ,  
Please contact us without any hesitations

Best wishes for you.

Enjoy yourself all the time.
