

To whom it may concern,

The Tesla Model Y is fitted with an anti-theft system approved to the requirements in UNECE Regulation No. 116 (Uniform technical prescriptions concerning the protection of motor vehicles against unauthorized use)

UNECE R116 Approval Number: **E9*116RLAI00/07*1403**

Description of the system:

Immobilizer

The system is capable of checking for an authorized key and performing a cryptographic exchange with the powertrain. Inadvertent activations are protected against by the use of strong cryptographic protocols, hardware security modules, and smart timeout and retry limitations.

Alarm

There are sensors fitted to each passenger door, the bonnet, and tailgate that sounds the alarm when they are opened.

Kind Regards
