Dear

Thank you for choosing to participate in the RES SERVICE-OPT B-HEV rate. Since you have participated in this rate for one year, we have compared your annual energy expense between the two rates.

Congratulations, you have saved \$1948.07 by being on this rate.

You may now choose to stay on the RES SERVICE-OPT B-HEV rate or return to the previous standard rate. Please remember that the guaranteed lowest rate offer only applies to the first year. No action is necessary to remain on this rate. However, if you would like to be removed, simply call Customer Service at (702) 402-5555.

By actively participating in any time of use rate, you help to reduce electricity consumption during On Peak times. This will help to keep energy costs down, reduce the impact on our environment and decrease our dependency on purchased power.

Below is a monthly comparison of your electric consumption:
