21-inch wheels are equipped with low-profile performance tires that provide less protection from, and are consequently more likely to suffer damage from, uneven road surfaces, debris, curbs, and other common obstacles. Damage to wheels or tires from these conditions are not covered under the Model S new vehicle limited warranty. 21-inch wheels with low-profile performance tires reduce battery range compared to 19-inch wheels with all season tires. Model S does not come with a spare wheel and tire.
