

Tesla

SmartFob – TF1

Concept by Andreu Michael

Front

The Tesla SmartFob connects the driver to Model S at the touch of a button.

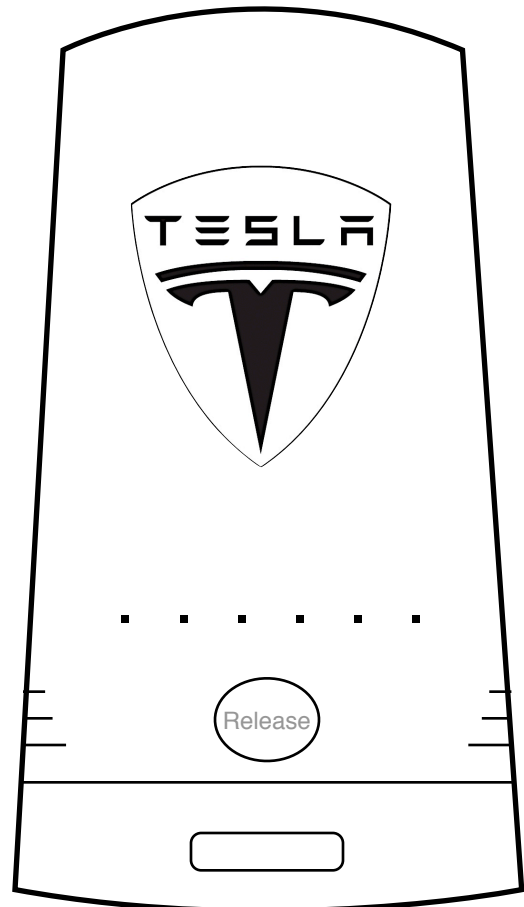

Press UNLOCK once to unlock and extend the driver's door and handle.

Press UNLOCK again to unlock and extend all doors and handles.

Press LOCK once to lock all doors and retrieve all handles.

Press LOCK again to set alarm.

Please note: If you do not press LOCK and the SmartFob travels more than 12-feet away from Model S, all doors will be locked, all handles will be retrieved and the car will arm itself after 60 seconds.

Back

Press CLIMATE to activate Auto-Climat and have Model S adjust inside cabin temperature to comfort and convenience level.

Press TRUNK once to raise hatch.

Press TRUNK again to lower hatch.

If you are unable to locate your Model S or in the event of an emergency that requires you so to do, press PANIC to have Model S emit the audible siren and emergency flashing lights.

SmartFob has a heads-up display showing real-time information about your Model S and surrounding conditions.
